INSTITUTIONAL SELF-ASSESSMENT

Introduction

The institutional self-assessment constitutes the most important part of the AIAASC accreditation process. Its purpose is to help institutions assess and improve existing operations. Moreover, as a comprehensive report documenting the institution's qualifications for accreditation based upon AIAASC's *Standards of Accreditation for International Higher Education*, the self-assessment provides external evaluators with a broad understanding of the institution's purpose, operational culture, administrative procedures, and educational outcomes. Once the self-assessment report has been peer-reviewed by AIAASC, a full accreditation site visit is conducted by higher educational professionals who use these standards, along with the institution's self-assessment and supporting documentary evidence, to evaluate institution-wide operations, to provide collegial peer-review, and to verify the institutional effectiveness and improvement plan. Upon completion of the site visit, the AIAASC accrediting organization judges the overall institutional record of compliance with AIAASC standards through its formal decision-making procedures. As such, AIAASC accreditation is designed to be a trust-based, standards-based, evidence-based, judgment-based, and peer-based process.

The *Standards of Accreditation for International Higher Education* constitutes the criteria against which an institution is evaluated and accredited. As such, the eight standards, corresponding indicators, and accompanying items of evidence define normative expectations and characteristics of good practice in international higher education and thus provide both a structured framework for engaging in institutional self-assessment and a process for demonstrating the positive outcomes of such self-assessment. Similarly, they enable AIAASC to monitor institutional or programmatic performance in advancing academic quality, student learning, and achievement.

AIAASC bases its accreditation judgments on the following areas: the mission, vision, and values of the institution; the design, delivery and assessment of American-styled educational programs; the instructional qualifications and teaching effectiveness of the faculty; the resources allocated for student support and safety; the structure and effectiveness of governance and leadership; the financial strength of the institution; the administrative staff and operating procedures; the suitability of buildings and facilities, information technologies, and physical grounds; the effectiveness of the institutional improvement plan; the commitment to institutional integrity and environmental sustainability; and other such key elements that demonstrate that the accredited institution is a quality, well-functioning, and ethically-grounded organization following recognized good practice in international higher education.

The AIAASC accreditation standards were developed specifically for institutions of international higher education and indicate high-quality educational practice. These standards should be used by the institutional stakeholders to self-assess their academic and administrative operations to ensure that they are providing rigorous educational programs consistent with the standards and practices of comparable international higher education institutions. Institutions that continually engage in self-assessment and set goals based on AIAASC standards—as described in the following seven self-assessment steps below—will ensure that they are providing high quality educational programs for all students.

STEP 1 CREATE THE SELF-ASSESSMENT STEERING COMMITTEE

Upon deciding to seek AIAASC accreditation, the institution should create a steering committee tasked with strategic oversight of both the larger accreditation review process and the more specific exercise of collecting documentary evidence and completing the self-assessment report. This committee will be responsible for providing leadership and institutional planning for the many requirements of institutional accreditation including, for example: allocating human and financial resources; creating administrative structures and procedures that support progress; establishing the timelines, targets, and milestones that must be met; and the identifying, collecting, and organizing of data and evidence that demonstrate institutional compliance with AIAASC standards.

Given the institution-wide nature of accreditation, the composition of the steering committee should be inclusive and diverse, representing as it must, the many interests and outlooks of institutional stakeholders. Because the process of self-assessment requires an in-depth review of all aspects of institutional operations—often requiring detailed and technical knowledge and information—the committee should include representatives of all functional departments. Responsibility for completing the different sections of the self-assessment should be divided among committee members. As a reflection of the entire institution and all its internal stakeholders, the completed self-assessment report should represent the steering committee’s collective work and findings and should not be the work of one or two individuals.

STEP 2 CONDUCT THE SELF-ASSESSMENT

To conduct the self-assessment, the steering committee carefully reviews each standard and evaluates the extent to which the institution may be deemed to be in substantial conformity with the general standard and corresponding indicators. Because the self-assessment process is designed to help the institution recognize strengths as well as identify, appreciate, and address weaknesses, the institution should not use the self-assessment process to merely defend existing policies and practice. The committee must be truthful and objective when evaluating institutional practice in order to ensure that the self-assessment process is being constructively followed and transparently presented. Every institution will have weak and strong areas. But by providing honest and objective assessments, the committee is able to commend the institution for the positive things it does well and focus on seeking continuous improvements to areas of relative weakness.

Using the AIAASC Self-Assessment Template

AIAASC has created a self-assessment template that is clearly articulated and easy to use, yet comprehensive in scope. For example, all AIAASC standards and indicators appear within the template so that steering committee members need not refer to separate copies of the eight standards. Similarly, each standard appears on a separate chart which can be easily copied and transferred to a separate document for treatment by individual steering committee members assigned to that standard. Finally, clear instructions for filling out the self-assessment report appear throughout the template.

To begin the process of self-assessment, the steering committee must qualitatively rate the institutional performance for each of the standards and corresponding indicators. This is done in two places in the self-assessment template. First, following the narrative summary of each of the eight standards, there is a comment field entitled “*Institutional Response and Approach to Standard*” in which the steering committee must provide a general yet brief description of how the institution strives to uphold the principles and practices affirmed in that standard. The steering committee should use this space to describe in general terms how institutional attitude and practice exemplify the spirit conveyed by the standard narrative summary.

Second, and more importantly, for each substantive element described in standard indicators, the steering committee must rate itself in the scoring rubric provided and briefly explain the reasons for selecting that rating. Please note that it is the standard indicators—and *not the introductory narrative summary*—that are used as criteria for evaluating compliance with the eight AIAASC accreditation standards. For this reason, it is important that the steering committee give particular thought and attention to each scoring rubric. Note also that longer and more complex indicators have two scorings rubrics to complete; one for the general principle affirmed, and a second for the examples listed in support of that principle. Dual rubric scorings apply to indicators 2.19, 2.21, 3.2, 3.9, 3.10, 3.13, 3.14a, 4.14, 4.15, 5.11, 5.22, 5.23, 5.24, 6.3b, 6.4, 7.1, 8.1, 8.4b, 8.8, and 8.10.

Rubric Scoring Guidelines

It is important that the steering committee read and interpret the scoring rubrics according to the following guidelines. In order that the scoring rubrics align to content of each specific indicator, there is necessarily some variability in the wording from one rubric to the next. However, most of the scoring rubrics for standard indicators require that the steering committee select from one of the following descriptors by checking the corresponding box.

☐ Initial processes ☐ Emerging processes ☐ Developed processes ☐ Extensive processes

N.B. Selecting is done by double-clicking on the desired checkbox and changing the default value to “Checked”. The same process is used for changing scores.

AIAASC has purposefully chosen these descriptors to describe the many possible developmental and progressive stages that characterize administrative practice in the design, delivery, and assessment of international higher education programs. Given the dynamic nature and changing landscape of international higher education, as well as the many new initiatives and responses that such change requires of such institutions, it is obvious that all institutions will have developed “*Extensive processes*” in some areas while simultaneously working to devise “*Initial processes*” in other emerging areas. Similarly, based upon new opportunities, new leadership, or a newly revised mission statement, even old and well-established institutions will find themselves faced with the task of creating new policies and programs that will necessarily remain in an “*initial phase*” for some time. For example, how institutions respond to the climate crisis by implementing a strategic plan for low-carbon operations is a case in point. As such and as stated above, the steering committee must evaluate its institutional practice with candor and humility if the self-assessment process is to be constructive and premised upon continuous improvement.

To this end, the following detailed descriptions and intended meanings of the scoring rubrics should help institutions self-assess in line with good practice.

Initial or Preliminary: This refers to any institutional process, policy, procedure, practice, plan, program, proposal, or effort that would be objectively described in one of the following manners, from more to less developed:

More Developed

- basic yet limited in scope
- under early development
- applied in some areas
- gradually being implemented
- a new yet untested initiative

Developed

- lacking in systematic application
- lacking in integrative application
- implemented as trial only
- random or haphazard application
- contested or confusing application

Less Developed

- minimal evidence
- tentative or under discussion
- no evidence
- not implemented
- does not exist

Emerging: This refers to any institutional process, policy, procedure, practice, plan, program, proposal, or effort that would be objectively described in one of the following manners, from more to less developed:

More Developed

- basic yet gaining in scope
- becoming well-developed
- applied in many areas to good effect
- early generalized implementation
- a new yet well-tested initiative

Developed

- gaining in systematic application
- gaining in integrative application
- gaining in standardized application
- suggestive of greater ambition
- general support increasing

Less Developed

- noteworthy as early practice
- applied in some areas to good effect
- planning is under development
- early targeted implementation
- general support exists

Developed or Substantial: This refers to any institutional process, policy, procedure, practice, plan, program, proposal, or effort that would be objectively described in one of the following manners, from more to less developed:

More Developed

- sound and effective application
- well-developed implementation
- applied in all areas to good effect
- generalized implementation
- uphold good practice

Developed

- applied systematically
- full integrative application
- standardized application
- align to good practice
- lead to positive outcomes

Less Developed

- noteworthy as established practice
- applied in most areas to good effect
- well-established implementation
- targeted implementation expanding
- reflect good practice

Extensive or Comprehensive: This refers to any institutional process, policy, procedure, practice, plan, program, proposal, or effort that would be objectively described in one of the following manners, from more to less developed:

More Developed

- highly effective application
- applied in all areas to excellent effect
- generalized effective implementation
- align to high professional standards
- show improvement of good practice

Developed

- systematic and coherent application
- reveal effective integrative strategies
- standardized and effective application
- lead to consistent positive outcomes
- reflect new trends in good practice

Less Developed

- follows established good practice
- applied in most areas to excellent effect
- fully-established implementation
- comprehensively applied
- exemplify good practice

To conclude, the self-assessment scoring rubrics, and the language used above to describe them, are designed to help the steering committee reflect upon and assess—*generally*—how well institutional policies and practices align to the AIAASC standards and indicators. Additional follow-up discussions about both the specific ratings selected and the general question of alignment to AIAASC standards takes place during the onsite accreditation visit. The steering committee should therefore think about the rubric scoring exercise not in terms of quantitative or qualitative “grades” or “ratings” but as indicators of where institutional practice currently lies on a continuum of ongoing efforts in institutional effectiveness and improvement.

STEP 3 IDENTIFY AND ASSEMBLE ITEMS OF EVIDENCE

Principles of Accreditation Evidence

Evidence is documentation that substantiates an institution’s assertion that it is in substantial conformity with AIAASC’s eight *Standards of Accreditation for International Higher Education* and therefore meets AIAASC eligibility requirements and standards for accreditation. As stated above, AIAASC accreditation is designed to be an evidence-based process for rendering judgments about the institution’s eligibility for accreditation. Assembling and using evidence to substantiate claims related to good practice in international higher education therefore constitutes the very foundation of the AIAASC accreditation process. For this reason, it is important that the steering committee keep itself fully informed of the principles and properties of good evidence within the specific

context of institutional accreditation. To this end, the *Northwest Commission on Colleges and Universities* (NWCCU), in appendix F page 81 of its accreditation handbook, provides a short yet useful [Guide to Using Evidence in the NWCCU Accreditation Process](#). AIAASC encourages the steering committee to review this guide in order to help ensure that the body of accreditation evidence it assembles meets the standards of being *relevant, verifiable, representative, cumulative, and actionable*.

With respect to completing the AIAASC self-assessment template, evidence is documentation or items that substantiate the steering committee's selected rating for a standard indicator. For pieces of physical evidence such as reports, forms, or written documents, the steering committee will gather items of such evidence for each indicator and organize them into a separate folder for each standard. The folders containing items of evidence will be reviewed during the institution's full accreditation visit, but the institution should also refer to these files as part of the continuous improvement process. For items of electronic evidence such as web-pages, online reports, or links to documents housed on internal servers, the steering committee will insert the designated electronic links directly into the self-assessment template in the field marked "*E-Links, Notes, or Comments*" and include any supplemental information as needed, such as page numbers, cross-references, or explanatory comments.

Types of Accreditation Evidence

Listed after each indicator are possible or suggested items of evidence, with an additional check-box for "Other". The steering committee may check as many boxes as required to show compliance with the standard indicator. However, the committee should only choose items of evidence that will support the rubric rating selected for the indicator. It is also important to note that the suggested items of evidence as listed for the many standard indicators are generally organized according to their relative strength in the following manner:

1. Official policy-based documents
2. Internal policies and procedures
3. Agenda, attendance, and meeting minutes
4. Internal records
5. Examples of practice
6. Descriptions of practice

In the hierarchy of evidence selected and supplied by the steering committee for the self-assessment report, official policy-based documents such as contracts, certificates, handbooks, codes, regulations, statements, speeches, etc., constitute the most direct and concrete evidence of established legal, administrative, and operational practice. Formal written and adopted policies and procedures also constitute strong evidence of good planning and practice. Moreover, the existence of sound policies and procedures governing all areas of institutional decision-making, resource allocation, academic programming, operations, and assessment should be considered the norm in international higher education. Next in order of value are the agenda, attendance records, and written minutes of formal internal meetings. Such meeting records help document institutional priorities and proceedings, strategy and operational tactics, internal consensus as well as dissent, decisions and actions, resources allocated, accountabilities delineated, and improvements made. Next in importance are internal records such as administrative charts, training logs, assessment studies, position papers, draft proposals, internal communications, personnel files, student files, forms and templates, and any other records that help convey the internal workings and daily operational culture of the institution. Also valuable are documented examples or case studies showing how the institution addressed specific issues related to faculty, staff, students and administrative processes. Indeed, where formal policies don't yet exist for individual or unique situations, such examples can help AIAASC peer reviewers better understand the institutional approach, attitude, and action vis-à-vis such situations.

Finally, in the absence of other more formal types of evidence, a written narrative, testimonial, or verbal description of decisions and actions carried out also provide insights into the general principles and practices followed by the institution when formal policy guidelines are lacking.

It is also appropriate to mention that the list of recommended evidence provided for each standard indicator—in addition to serving as a menu to choose from for documenting AIAASC standards compliance—also serves as a pathway towards the larger goal of continuous improvement and greater institutional effectiveness. To this end, AIAASC encourages the members of the steering committee to regard the recommended items of evidence—where they don't yet exist—as possible policies, procedures, and initiatives to adopt as part of the institutional improvement plan and larger impulse towards continuous improvement.

In any event, when deciding what evidence to produce in support of AIAASC standard indicators, the steering committee should always strive to produce items of evidence that are relevant to the indicator under consideration, verifiable for the AIAASC peer review team, representative of wider practice, subject to confirmation and corroboration by multiple sources, and actionable in terms of providing pathways to continuous improvement.

STEP 4 CREATE THE INSTITUTIONAL IMPROVEMENT PLAN

After the self-assessment report has been completed the steering committee should use its findings to create an institutional improvement plan. All indicator scorings should be prioritized according to areas of greatest need and urgency. Indicators with the lowest scorings should become the main areas of focus for the institutional improvement plan. See the AIAASC guidelines on the *Institutional Improvement Process*. (Under development)

STEP 5 SUBMIT THE SELF-ASSESSMENT REPORT

Four months prior to the scheduled full accreditation visit, e-mail the completed self-assessment report and institutional improvement plan to the chair of the AIAASC accreditation team.

STEP 6 PREPARE THE ONSITE ACCREDITATION VISIT

The completed self-assessment report, along with the items of evidence, and institutional improvement plan will be used by the accreditation team to evaluate and validate the institution's self-assessment processes, and to assist in verifying whether the institution meets the AIAASC standards for accreditation.

STEP 7 UPDATE AND REVIEW THE INSTITUTIONAL IMPROVEMENT PLAN

Following the full accreditation visit, the institution will receive a *Visiting Team Accreditation Report*. This report will contain the accreditation team's ratings for each indicator, as well as commendations, recommendations, and required actions for selected indicators.

The institution should then update the improvement plan based upon the *Visiting Team Accreditation Report*. Indicators with the lowest ratings should become the areas of focus and priorities for the improvement plan. Any required actions must be immediately added to the institutional improvement plan and completed by the dates as indicated in the report. The institution should regularly self-assess itself to monitor its progress on all indicators of the AIAASC Standards.

REQUIRED ITEMS OF EVIDENCE

The institution must show evidence of the following requirements:

| YES | NO | |
|--------------------------|--------------------------|---|
| <input type="checkbox"/> | <input type="checkbox"/> | <i>Double click on box to mark with an "x." Change default value from "Not Checked" to "Checked."</i> |
| <input type="checkbox"/> | <input type="checkbox"/> | The institution is licensed by or approved by the government of the country where the institution is located. |
| <input type="checkbox"/> | <input type="checkbox"/> | The institution has been in operation for a minimum of one year. |

ACCREDITATION STANDARDS SELF-ASSESSMENT TEMPLATES

STANDARD 1 — VISION, MISSION, AND VALUES

| STANDARD 1 — VISION, MISSION, AND VALUES | | | |
|---|---|--|--|
| <p>The institution articulates a mission that defines institutional purposes, priorities, and goals appropriate to international higher education. It gives direction to operational activities and provides guidance to internal and external stakeholders. The mission conveys core values that place student learning, development, and achievement at the center of the institutional endeavor. Institutional governance is attentive to the changing landscape of international higher education and uses such insight for improving institutional effectiveness through an ongoing process of reviewing and revising, as needed, the mission and assessment of mission and goal achievement. The mission provides a basis for engaging in institutional reflection, internal and external assessment, and quality improvement. Together, the vision, mission, and values statements empower the institution to help students identify and establish their place within a rapidly changing and ecologically challenged globalized society.</p> | | | |
| <p>Institutional Response and Approach to Standard 1: <i>Comment here:</i></p> | | | |
| Indicator | The institution's vision of the challenges of the globalized society that its students and stakeholders will encounter is clearly articulated. | | |
| 1.1a | | | |
| | Rubric Scoring <input type="checkbox"/> No such articulation <input type="checkbox"/> Basic <input type="checkbox"/> Developed <input type="checkbox"/> Highly developed articulation | Comments: <i>Briefly explain this rating.</i> | |

| END OF STANDARD 1 | | | |

STANDARD 2 — STUDENT LEARNING, DEVELOPMENT, AND ACHIEVEMENT

| STANDARD 2 — STUDENT LEARNING, DEVELOPMENT, AND ACHIEVEMENT | | | |
|--|--|---|---|
| <p>The institution's educational programs clearly reflect its vision, mission, and values and set standards for student learning, development, and achievement consistent with international higher education expectations and appropriate to the degrees, certificates, credentials, and employment to which they lead. The institution places its primary focus on the quality of student learning, development, and achievement within its educational programs.</p> <p>The institution encourages students to take responsibility for, and gain autonomy in, the learning process, the building upon prior knowledge, and the application of such learning towards further education, career development, and civic engagement with global issues.</p> | | | |
| Institutional Response and Approach to Standard 2: <i>Comment here:</i> | | | |
| Indicator | The content, delivery, goals, and intellectual rigor of academic programs are consistent with the institution's vision, mission, and values. | | |
| 2.1 | | | |
| Rubric Scoring | <input type="checkbox"/> Initial alignment <input type="checkbox"/> Emerging <input type="checkbox"/> Substantial <input type="checkbox"/> Full & consistent alignment | | Comments: <i>Briefly explain this rating.</i> |

| END OF STANDARD 2 | | | |

STANDARD 3 — INSTRUCTIONAL DESIGN, DELIVERY, AND ASSESSMENT

STANDARD 3 — INSTRUCTIONAL DESIGN, DELIVERY, AND ASSESSMENT

The institution demonstrates a clear process for designing, delivering, and assessing instructional effectiveness premised upon achieving quality student learning and developmental outcomes. The institution demonstrates a commitment to improving curricular design, review, and relevance; to enhancing pedagogical practice; to providing faculty with training in high-impact and applied learning instructional practice; and to improving information literacy and the use of learning technologies.

The institution demonstrates its commitment to continuous improvement by validating student learning and developmental outcomes, programmatic outcomes, and student achievement using both direct/indirect measures and internal/external assessment processes that are systematic, socially responsible, and pertinent to today's global challenges.

Institutional Response and Approach to Standard 3: *Comment here:*

| Indicator | Consistent with professional standards, the institution places faculty at the center of curricular design, development, review, and improvement. | | |
|-----------|---|--|--|
| 3.1a | Rubric Scoring <input type="checkbox"/> Initial processes <input type="checkbox"/> Emerging <input type="checkbox"/> Developed <input type="checkbox"/> Extensive processes | Comments: <i>Briefly explain this rating.</i> | |

STANDARD 4 — STUDENT SUPPORT SERVICES

STANDARD 4 — STUDENT SUPPORT SERVICES

External to the classroom, a multitude of services and resources are provided to support student learning, development, achievement, and well-being. These services include, but are not limited to: access to up-to-date media and technology resources; co-curricular programs and activities; and structured opportunities for community service and civic engagement. In support of student physical and mental health, the institution provides for student counseling services or referral information, as well as designated safe-spaces for students encountering any form of harassment or discrimination. The institution provides access to health facilities, staffed by qualified medical personnel, for students who become ill or are in need of medical attention.

Institutional Response and Approach to Standard 4: *Comment here:*

| Indicator | Consistent with its mission, the institution provides adequate financial resources and program coordination for appropriate student support services. | | |
|-----------|--|--|--|
| 4.1 | Rubric Scoring <input type="checkbox"/> Inadequate <input type="checkbox"/> Mostly adequate <input type="checkbox"/> Adequate <input type="checkbox"/> More than adequate | Comments: <i>Briefly explain this rating.</i> | |
| | Evidence Provided: <i>Indicate items of evidence provided by the institution to demonstrate compliance with each standard indicator. | END OF STANDARD 4 | | |

STANDARD 5 — LEADERSHIP, GOVERNANCE, AND ADMINISTRATION

STANDARD 5 — LEADERSHIP, GOVERNANCE, AND ADMINISTRATION

Institutional leadership demonstrates a clear capacity for analyzing, apprehending, and adapting to the changing landscape of international higher education. Attentive to internal and external opportunities and risks, leadership engages in strategic thinking, future-oriented planning, and innovation to achieve continuous improvement in student learning, development, achievement, and success. Strategic decision-making and resource allocation by leadership are grounded in the feed-back loops of internal quality assurance and institutional research, informed by input provided by core stakeholders both inside and outside the institution, and assessed against key performance indicators identified in the institutional effectiveness and improvement plan, each consistent with the mission.

The institution demonstrates its commitment to effective governance through the principles of coherency, transparency, and accountability. The institution articulates formal policies and procedures that provide guidance, direction, and accountability to executive, administrative, and instructional staffs. Decision-making processes are clear and reflect functional lines of authority and leadership. Student learning, development, and achievement are enhanced by well-defined, appropriately staffed, and coherently organized administrative support structures. Administrative functions and responsibilities are communicated clearly to all stakeholders.

Institutional Response and Approach to Standard 5: *Comment here:*

| Indicator | The institution establishes and publishes governance structures, administrative hierarchies, organizational charts, and staffing support that are effective and appropriate for the scale and complexity of institutional operations. | | |

| END OF STANDARD 5 | | | |

STANDARD 6 — FACILITIES, SAFETY, AND MAINTENANCE

STANDARD 6 — FACILITIES, SAFETY, AND MAINTENANCE

Consistent with its mission, the institution demonstrates that its classroom, specialized teaching areas, office, and support facilities are safe, secure, and fully adequate for ensuring academic quality and student achievement within its educational programs and student support services. Students, faculty, and staff have access to learning and working spaces appropriate to their respective needs and connected to information technology and Wi-Fi services, access to an appropriate sized commons room, closed-space independent group study areas, informal study areas, and access to recreational and refreshment areas. The cleanliness and maintenance of facilities and grounds provide evidence of stakeholder pride in the institution.

STANDARD 7 — QUALITY ASSURANCE AND INSTITUTIONAL EFFECTIVENESS

STANDARD 7 — QUALITY ASSURANCE AND INSTITUTIONAL EFFECTIVENESS

The institution has a clearly articulated internal system of quality management and is committed to conducting a comprehensive and continuous evaluation of its educational and administrative domains to identify areas of strength and sustainability, as well as areas of weakness and needed improvement. Consistent with its mission, the institution develops a comprehensive profile that indicates: the nature of the students served; the community, city and country in which the institution operates; and detailed performance indicators of student learning, development, achievement, and success.

In consideration of its profile and consistent with its mission, the institution creates and updates a comprehensive improvement plan with measurable goals centered on student learning, development, achievement, and success. The improvement plan engages stakeholders in an evidence-based, collaborative, and continuous process of institutional self-reflection and evaluation. Institutional improvement is focused upon improving student learning, development, achievement, and success, as well as supporting student services and programs.

Institutional Response and Approach to Standard 7: *Comment here:*

| Indicator | Consistent with its mission and in an effort to align institutional improvement with student needs, the institution publishes an easily accessible public profile of key institutional facts and characteristics which should include, but not be limited to: origins and historical development; size and composition of student body; leadership and staff qualifications; physical attributes and location of campus within the local community; academic and co-curricular programs and support services; indicators of student performance, achievement, and career outcomes; and institutional commitment to environmental stewardship. | |

STANDARD 8 — ETHICS AND INSTITUTIONAL INTEGRITY

STANDARD 8 — ETHICS AND INSTITUTIONAL INTEGRITY

The institution demonstrates that integrity and ethical conduct codified into written policy constitute foundational principles essential to the purpose, function, and ethos of international higher education. Guided by the core components of integrity—honesty, transparency, and action anchored to ethical principle—the institution aspires to the highest standards of conduct at each stage in its planning, policy-making, administrative, instructional, assessment, and external operations. The institution subscribes to, and actively promotes, integrity and openness in its relations with students, faculty and staff, external partners, and community stakeholders. The institution provides evidence of its commitment to integrity through the actions it takes, the character it conveys, and the impact of its endeavors.

Institutional Response and Approach to Standard 8: *Comment here:*

| Indicator | The institution's commitment to integrity is affirmed in a formal and written code of ethics which is easily accessible to stakeholders. The code should include guidelines on, but not be limited to: academic freedom, student rights, responsibility to students, intellectual property rights, copyright regulations, grievance policies, regulatory compliance, managing conflicts of interest, non-discrimination across policy and practice, observance of recognized good practice, and environmental responsibility. | | |
|--|---|--|--|
